Examiner Comments

1. During the telephonic interview of December 6, 2006, applicant's representative provided an explanation of the relevance of the foreign references found in the Information Disclosure Statement of July 24, 2006. Examiner pointed out that the oral statement of relevance concerning the German reference 1 903 801 does not appear to match the reference copy filed by applicant. Specifically, the figures in DE 1 903 801 appear to be an electric schematic of a wiping device and not a bearing device. In the remarks filed January 3, 2007, applicant's representative provided a written statement of relevance of DE 1 903 801, however it is again noted that applicant's statement of relevance does not appear to correspond to the reference found in the file. Accordingly, Examiner has only considered the foreign reference found in the file that is directed to a wiping device.

2. The withdrawn claims have been rejoined as being dependent on an allowable generic claim.
